
Games

Lili and Bibi loves to play a game called tic tac toe. They have played N games in a row. For each game, it is known who was the winner, Lili or Bibi. Now Lili wonders, who won more games, she or Bibi? Help her determine this by making a program that output who wins more.

Format Input

The first line of input consist integer T, the number of the testcase. The next X lines consist integer N and string S, consisting of N uppercase letters 'B' when Bibi won the game, 'L' when Lili won the game and 'T' when it is tie.

Format Output

Output "Lili" (without quotes) if Lili won more than Bibi, "Bibi" (without quotes) if Bibi won more than Lili, "None" (without quotes) if they won the same number of games.

Constraints

$1 \leq T \leq 100$

$1 \leq N \leq 100$

Sample Input	Sample Output
2 10 L B L B L B L B L B 5 L B L L L	None Lili
